DBMS Lab Practical 3 – SQL DML Statements

Problem Statement:

1. Create table Student with schema (roll_no, name, division, branch, city, marks)
2. Insert 10 records to the table students
3. List all the student names with their corresponding city
4. List all the distinct names of the students
5. List all the records of the students with all the attributes
6. List all the students whose marks are greater than 75
7. List all the students whose name starts with the alphabet 'S'
8. List all the students whose marks are in the range of 50 to 60
9. List all the students whose branch is 'computer' and city is 'Pune'
10. Update the branch of a student to 'IT' whose roll number is 9
11. Delete the student records whose division is 'BE'
12. Create another table TE_Students with Schema(roll_no, name)
13. Insert 10 records to the table TE_Students
14. List all the roll numbers unionly in the relations Student and TE_Students

'Cust_View' to display customer ID, product, total price
